An inhaler, syrup, drug and a vaccine for curing COVID-19

S. Kalimuthu¹

1 2/394, Kanjampatti P.O, Pollachi Via, Tamil Nadu 642003, India

ABSTRACT

Corona viruses are a large family of viruses that are known to cause illness ranging from the common cold to more severe diseases such as Middle East Respiratory Syndrome (MERS) and Severe Acute Respiratory Syndrome (SARS). A novel corona virus (Co V) is a new strain of corona virus that has not been previously identified in humans. Corona viruses can be transmitted from person to person, usually after close contact with an infected patient. There is no specific treatment for disease caused by a novel corona virus. In this Hypothesis, the author proposes an alternative herbal inhaler, syrup, drug and a vaccine for curing Covid-19.

Keywords: Severe Acute Respiratory Syndrome (SARS), COVID-19, Vaccine.

HYPOTHESIS

Choose the juices of the following herbs in equal quantity:

Ginger, Carlic, Basellaalba, Amaranthus tricolor, Moringa pterigosperma GLoertn, Solanum trilobathum, Oxalis Corniculatta, Nervilla Aragoana, Hybanthus Enneaspermus, Eclipta Prostrata Roxb, Cynodon Dactylon, Ipomea Sepiaria, Khadira blossoms, orange and Hibiscus.

The above mentioned juices can be prepared as an inhaler, syrup, drug or a vaccine. This process may be done as per modern scientific mode of drug preparation. This can be trialed for R & D. Since these herbals have no side effects, we need not hesitate to test these drugs.

DISCUSSION

Before the development of modern allopathic treatments, people had to rely on natural remedies. The above mentioned herbs possess curable vitamins. Since there are no chemicals, we need not worry about negative results. The author is an independent researcher in mathematical sciences, alternative yoga and alternative medicine.[1] & [2] The author had tested these herbs in the past and found successful results. The author has solved 2300 years old mathematical impossibility. The author has been maintaining his prolonged research by consuming the above juices almost regularly. This proposal keeps the author fresh and healthy even at the age of 70.
